

Internet Banking for Business Guide

Statement Data Files

January 2024

Introduction

BNZ offers account balance and transaction data files via the File Downloads feature in IB4B. Collectively referred to as Statement Data files, these files are generated daily and are available to download if you are set up to receive statement files.

This guide provides an overview of the Statement Data files format following BNZ GIFTS format. The file format sections detail the contents of each field, so will be a handy reference if want to understand the content format of downloaded data files.

If you have any questions, please contact **0800 269 4242** (New Zealand toll free) or **+64 4 931 8234** (international direct dial).

Glossary of Terms

This table describes some of the terms used throughout this document.

Term	Description
A	Alphanumeric – this field can include any of the following. Letters: a - z and A - Z Numbers: 0 - 9 and special characters: -'&/#?:_ .space
N	Numeric – this field can only contain numbers 0 - 9.
Transaction	Each individual item within the file
FCA	Foreign Currency Account

Statement data file overview

IB4B delivers daily account balance and transactional statement data files for many different account types, across several financial institutions. These can be uploaded into your accounts receivable application to speed up daily reconciliations.

BNZ offers these data files via the File Downloads feature in Internet Banking for Business (IB4B). Once set up for File Downloads, you will receive one data file per day, for the following account types: Everyday Accounts, Credit Card Accounts and Foreign Currency Accounts. Data files are available in BNZ GIFTS format.

Key overview

- BNZ offers account balance and transaction reporting in IB4B, and in BNZ GIFTS format.
- Specific fields are contained within quotation marks (“”).
- Data files are delivered as comma delimited ASCII files. The fields within each record are separated by commas.
- Each record will terminate with a carriage return line feed character (CRLF).
- To receive statement balance and transactional data files, your site must be set up for File Downloads – contact your Relationship Manager to find out how.
- Files are generated daily.
- Data file permissions must be assigned to your site to receive data file downloads.
- Each transactional data file will contain one or more transaction records and a control record.
- If saving your data files, you must nominate a location on your computer where you want your files to be stored.

Types and naming convention

BNZ statement data files have the following file types, contents and filename format. Balance data files have the suffix 'BAL' and transaction data files have the suffix 'TRN'.

The file date refers to the date the file was generated, not the date the transactions were posted. E.g. a file date of 22 Jan 2024 will contain activity for 21 Jan 2024.

Type	Format	Contents	Filename format
BNZ Everyday, FCA and credit card accounts	BAL (balances)	Opening and closing balances, along with the total value of the debits and credits for each nominated Everyday account (including domestic accounts and credit card balances).	YYMMDD.BAL
BNZ Everyday, FCA and credit card accounts	TRN (transactions)	The total debits and credits for each nominated Everyday account, including domestic accounts and credit card balances. BNZ Foreign Currency Account transactions and balances are also appended directly to the end of this file.	YYMMDD.TRN
Other bank - ANZ	BAL (balances)	Opening and closing balances, along with the total value of the debits and credits for each nominated ANZ account.	anYYMMDD.BAL
Other bank - ANZ	TRN (transactions)	All the information contained in the balance data file plus details of all the transactions debited and credited from each nominated account ANZ account.	anYYMMDD.TRN
Other bank - ANZ (formerly National Bank)	BAL (balances)	Opening and closing balances, along with the total value of the debits and credits for each nominated ANZ (formerly National Bank) account.	naYYMMDD.BAL
Other bank - ANZ (formerly National Bank)	TRN (transactions)	All the information contained in the balance data file plus details of all the transactions debited and credited from each nominated account ANZ (formerly National Bank) account.	naYYMMDD.TRN
Other bank - Westpac	BAL (balances)	Opening and closing balances, along with the total value of the debits and credits for each nominated ANZ Westpac account.	wbYYMMDD.BAL
Other bank - Westpac	TRN (transactions)	All the information contained in the balance data file plus details of all the transactions debited and credited from each nominated Westpac account.	wbYYMMDD.TRN
National Australia Bank (NAB)	BAL (balances)	Opening and closing balances, along with the total value of the debits and credits for each nominated NAB account.	nbYYMMDD.BAL
National Australia Bank (NAB)	TRN (transactions)	All the information contained in the Balance data file plus details of all the transactions debited and credited from each nominated NAB account.	nbYYMMDD.TRN

Transaction data files high level structure

Transaction files for Bank of New Zealand, ANZ, National Bank, Westpac and National Australia Bank accounts have the structure detailed below. Each transaction file can contain data on one or more individual accounts.

There may be any number (including none) type 3 record for each account. The type 3,5,6 and 8 records repeat for each account within the file. The type 9 records are a summary of all the domestic accounts within the file and are found once at the end of the file.

Domestic account 1

Type 3	Transaction record
:	:
Type 3	Transaction record
Type 5	Opening balance record
Type 6	Closing balance record
Type 8	Account total debits record
Type 8	Account total credits record

Domestic account 2

Type 3	Transaction record
:	:
Type 3	Transaction record
Type 5	Opening balance record
Type 6	Closing balance record
Type 8	Account total debits record
Type 8	Account total credits record

Domestic account 3

:	continuing for each account
---	-----------------------------

Domestic balance data files (BNZ GIFTS format)

A single balance data file will be available to download daily for each type or groups of accounts:

- BNZ Everyday
- Credit card accounts
- Other bank - ANZ
- Other bank - ANZ (formerly National Bank)
- Other bank - Westpac
- National Australia Bank

Note that Foreign Currency Account balances are not shown in the balance data file. Foreign Currency Account balances are appended directly to the end of the FCA transaction file.

Contents will be in the format as detailed on the table below and as shown in the example.

Example:

123456,"02-0123-0123456-00", 098656099.38,-000000002.01, 000033677.06, 098689774.43,"08/11/23"

Field	Field name	Field format	Comments
1	Subscriber ID	N (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
2	Account number	N (11)	Quoted string. NAB Domestic accounts are in 2-3-4 format, hyphens included. The six digit BSB number is not included.
3	Opening balance	N (13)	The balance is presented with two decimal places and no thousand ('000) separators. The amount is right aligned and zero filled. Debit amounts are preceded by a minus sign. Credit amounts are preceded by a space. Examples: 000000375.99 -000001234.56
4	Total value of the debit transactions	N (13)	The amount is presented with two decimal places and no thousand ('000) separators. The amount is right aligned and zero filled. Values other than zero are preceded by a minus sign. Zero is preceded by a space. Examples: 000000000.00 -000001234.56
5	Total value of the credit transactions	N (13)	The amount is presented with two decimal places and no thousand ('000) separators. The amount is right aligned and zero filled. Values are preceded by a space. Example: 000000375.99

Field	Field name	Field format	Comments
6	Closing balance	N (13)	The balance is presented with two decimal places and no thousand ('000) separators. The amount is right aligned and zero filled. Debit amounts are preceded by a minus sign. Credit amounts are preceded by a space. Examples: 000000375.99 -000001234.56
7	Transaction date	N (8)	Quoted string in "DD/MM/YY" format. The date for which account balance records apply.

Domestic transaction data files (BNZ GIFTS format)

A single transaction data will be available to download daily for each type or groups of accounts:

- BNZ Everyday
- Credit card accounts
- Other bank - ANZ
- Other bank - ANZ (formerly National Bank)
- Other bank - Westpac
- National Australia Bank

*FCA balances appear appended to the end of the FCA transaction file.

Contents will be in the format as detailed on the table below and as shown in the example.

Example:

3,123456,"02-0123-0123456-00",3.30,000000000000,050,"ALL CARDS","100965660","STARVIEW","STARVIEW LIBRARY","02/11/23","02-0499","PS","0001","02-0987-0010732-00"

Field	Field name	Field format	Comments
1	Record type	N (1)	3 = Transaction record
	Subscriber ID	N (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
3	Account number	N (18)	Quoted string. Domestic bank account numbers are in 2-4-7-2 format, hyphens included. BNZ Visa or MasterCard Credit Cards are in 8-4-4 format, hyphens included.
4	Transaction amount	N (Min 4)	The amount is presented with two decimal places and no thousand ('000) separators. Debit amounts are preceded by a minus sign. The amount is not left-filled with zeros. The field has a minimum length of four. Examples: -1304.00, 0.01
5	Serial number	N (12)	Cheque serial numbers are located here if applicable. Otherwise this field is zero-filled.
6	Transaction code	N (3)	Two digit transaction code is left-filled with a zero. 000-049 range are debit (withdrawal) transactions, 050-099 range are credit (deposit) transactions.
7	Particulars	A (Max 12)	Quoted string, "" if no data exists. If the originator of the transaction included information in the Particulars field, then it will appear here.
8	Code	A (Max 12)	Quoted string, "" if no data exists. If the originator of the transaction included information in the Code field, then it will appear here.
9	Reference	A (Max 12)	Quoted string, "" if no data exists. If the originator of the transaction included information in the Reference field, then it will appear here.
Field	Field name	Field format	Comments

10	Other party name	A (Max 20)	Quoted string, empty if no data. The name of the party who originated this transaction. e.g. "HIXX LIMITED"
11	Transaction date	A (8)	Quoted string in DD/MM/YY format. The date the transaction processed in or out of your account.
12	Originating bank and branch	A (7)	Quoted string in BB-bbbb format. Where BB = bank, bbbb = branch. The bank and branch number of the originator of the transaction. e.g. 01-1255
13	Statement indicator	A (2)	Quoted string. Common codes include: AP = Automatic Payment BP = Bill Payment DC = Direct Credit ET = Electronic Transfer PS = Eftpos TB = Telephone Banking FX = Foreign Transfer
14	Batch number	N (4)	Quoted string. The batch number of the inputting bank and branch.
15	Other party account number	N (18)	Quoted string. This is an optional output field. Domestic bank accounts are in 2-4-7-2 format, hyphens included. Is blank if no account number provided

Opening balance record

Example:

5,123456,"02-0123-0123456-00",274.39,"","","OPENING BALANCE","","","J BLOGGS","02/11/23"

Field	Field name	Field format	Comments
1	Record type	N (1)	5 = Opening Balance record
2	Subscriber ID	N (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
3	Account number	A (18)	Quoted string. Domestic bank account numbers are in 2-4-7-2 format, hyphens included. BNZ Visa or MasterCard Credit Cards are in 8-4-4 format, hyphens included.
4	Opening balance	N (Min 4)	The balance is presented with two decimal places and no thousand ('000) separators. Debit amounts are preceded by a minus sign. The amount is not left-filled with zeros. The field has a minimum length of four. Examples: -1304.00 0.01
5	Spare	A	Quoted string, " " if no data exists.
6	Spare	A	Quoted string, " " if no data exists.
7	Record description	A (17)	Quoted string. Fixed content, always "OPENING BALANCE"
8	Spare	A	Empty quoted string.
9	Spare	A	Empty quoted string.
10	Account owner name	A (Max 20)	Quoted string. The account owner's name. e.g. "MOOLI C D CHAIN"
11	Transaction date	A (8)	Quoted string in "DD/MM/YY" format. The date for which this opening balance amount applies.

Closing balance record

Example:

6,123456,"02-0123-0123456-00",97865.55,"","","CLOSING BALANCE","","","BAKING CO","02/11/23"

Field	Field name	Field format	Comments
1	Record type	N (1)	6 = Closing balance
2	Subscriber ID	N(6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
3	Account number	N (18)	Quoted string. Domestic bank account numbers are in 2-4-7-2 format, hyphens included. BNZ Visa or MasterCard Credit Cards are in 8-4-4 format, hyphens included.
4	Closing balance	N (Min 4)	The balance is presented with two decimal places and no thousand ('000) separators. Debit amounts are preceded by a minus sign. The amount is not left-filled with zeros. The field has a minimum length of four. Examples: -1304.00 0.01
5	Spare	A	Empty quoted string.
6	Spare	A	Empty quoted string.
7	Record description	A (17)	Quoted string. Fixed content, always "CLOSING BALANCE"
8	Spare	A	Empty quoted string.
9	Spare	A	Empty quoted string.
10	Account owner name	A (Max 20)	Quoted string. The account owner's name.
11	Transaction date	N (8)	Quoted string in "DD/MM/YY" format. The date for which this closing balance amount applies.

Account suffix total record

Example:

8,123456,"02-0123-0123456-00",-1207.66,1,000,"DEBITS ",",",",",",",02/11/23"

Field	Field name	Field format	Comments
1	Record type	N (1)	8 = Suffix Total
2	Subscriber ID	N (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
3	Account number	A (18)	Quoted string. Domestic bank account numbers are in 2-4-7-2 format, hyphens included. BNZ Visa or MasterCard Credit Cards are in 8-4-4 format, hyphens included.
4	Sum of amounts for this suffix	N (Min 4)	The amount is presented with two decimal places and no thousand ('000) separators. Debit amounts are preceded by a minus sign. The amount is not left-filled with zeros. The field has a minimum length of four. Note, for the debit record, zero will be presented as -0.00. Examples: -1304.00, 0.01
5	Total number of transactions	N (Max 6)	A count of the type 3 (transaction) debit or credit records for this account, Zero if no type 3 records exist for this account, This field is not zero-padded.
6	Transaction code	N (3)	000 for Debits 050 for Credits
7	Record description	A (7)	Quoted string. Fixed content, always either "DEBITS" (note the trailing space) or "CREDITS"
8	Spare	A	Quoted string, "" if no data exists.
9	Spare	A	Quoted string, "" if no data exists.
10	Spare	A	Quoted string, "" if no data exists.
11	Transaction date	A (8)	Quoted string in "DD/MM/YY" format. The date for which these account suffix total records apply.

Foreign Currency Account transactions

Foreign Currency Account transactions and balances are supplied in the following format within the FCA Transaction file. FCA balances are appended directly at the end of the FCA transaction file.

File structure

The file consists of five distinct record types:

30	Balance record	One per account
50	Transaction summary record	One per account
51	Debit transaction record	One per debit transaction
52	Credit transaction record	One per credit transaction
53	Reference record	One created for each 51 or 52 record

There is no file header. Each record is identified by a record type field at position 20-21.

Foreign Currency Account 1

```

30 Balance Record
50 Transaction Summary Record
52 Transaction Record
53 Reference Record
51 Transaction Record
53 Reference Record
:
52 Transaction Record
53 Reference Record

```

Foreign Currency Account 2

```

30 Balance Record

```

Foreign Currency Account 3

```

30 Balance Record
50 Transaction Summary Record
51 Transaction Record
53 Reference Record
51 Transaction Record
53 Reference Record
:
52 Transaction Record
53 Reference Record
: continuing for each account

```

Balance record (-30)

Example:

123456123677786000830 000000054868723+003000000054548918+
001000000045867823+003SGDD01151211

Field	Field name	Field format	Comments
1	Subscriber ID	N (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
2	Midas branch	N (3)	Midas branch, no longer used. Set to the same default value of '123' for all customers on all accounts.
3	Account number	N (10)	Foreign Currency Account number. Foreign currency accounts have the following structure: a six digit account number followed by a four digit suffix.
4	Record type	N (2)	30 = Balance record
5	Spare	A (2)	Currently an unused field, left blank.
6	Closing balance	N (15)	No decimal point present, no thousand ('000) separators. The amount is right aligned and zero filled.
7	Closing balance indicator	N (1)	+ = Credit balance - = Debit balance
8	Balance type indicator	N (3)	003 = Closing balance
9	Opening balance	N (15)	No decimal point present, no thousand ('000) separators. The amount is right aligned and zero filled.
10	Opening balance indicator	N (1)	+ = Credit balance - = Debit balance
11	Balance type indicator	N (3)	001 = Opening balance
12	Closing available balance	N (15)	No decimal point present, no thousand ('000) separators. The amount is right aligned and zero filled.
13	Closing available balance indicator	A (1)	+ = Credit balance - = Debit balance
14	Balance type indicator	N (3)	003 = Closing balance
15	Account currency	A (3)	Swift 3 character currency codes. Some examples include: AUD = Australian Dollars, EUR = Euro, USD = United States Dollars, SGD = Singapore Dollars
16	Decimal indicator	N (3)	If the currency has two decimal places, contains D01. Otherwise, contains I01.
17	Balance date	N (6)	Quoted string in "YY/MM/DD" format. The date for which these 'all accounts total' records apply.

Transaction summary record (-50)

The transaction summary record immediately follows the Foreign Currency Account balance record, held within the transactional data file.

Field	Field name	Field format	Comments
1	Subscriber ID	9 (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
2	Midas branch	9 (3)	Midas branch, no longer used. Set to the same default value of '123' for all customers on all accounts.
3	Account number	9 (10)	Foreign Currency Account number. Foreign currency accounts have the following structure: a six digit account number followed by a four digit suffix.
4	Record type	9 (2)	50 = Transaction summary record
5	Spare	X (2)	Currently an unused field, left blank.
6	Spare	9 (1)	Currently an unused field, left blank.
7	Number of debit transactions	9 (5)	A count of the debit transactions for this account on this day.
8	Spare	X (2)	Currently an unused field, left blank.
9	Value of debit transactions	9 (15)	No decimal point present, no thousand ('000) separators. The amount is right aligned and zero filled.
10	Value indicator	X (1)	Contains - to indicate a debit balance
11	Number of credit transactions	9 (5)	A count of the credit transactions for this account on this day.
12	Value of credit transactions	9 (15)	No decimal point present, no thousand ('000) separators. The amount is right aligned and zero filled.
13	Value indicator	X (1)	Contains + to indicate a credit balance
14	Transaction currency	X (3)	Swift 3 character currency codes. Some examples include: AUD = Australian Dollars, EUR = Euro, USD = United States Dollars
15	Spare	X (1)	If the currency has two decimal places, this field will hold D otherwise it will hold I.

Transaction record (51, 52)

Field	Field name	Field format	Comments
1	Subscriber ID	9 (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
2	Midas branch	9 (3)	Midas branch, no longer used. Set to the same default value of '123' for all customers on all accounts.
3	Account number	9 (10)	Foreign Currency Account number. Foreign currency accounts have the following structure: a six digit account number followed by a four digit suffix.
4	Record type	9 (2)	51 = debit transaction (withdrawal) 52 = credit transaction (deposit)
5	Spare	X (16)	Currently an unused field, left blank.
6	Value date	9 (6)	In YYMMDD format. The date on which this transaction cleared.
7	Spare	X (4)	Currently an unused field, left blank.
8	Transaction amount	9 (15)	No decimal point present, no thousand ('000) separators. The amount is right aligned and zero filled.
9	Narrative	X (30)	Sprint reference. A bank generated reference for this transaction.

Reference record (53)

Field	Field name	Field format	Comments
1	Subscriber ID	9 (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
2	Midas branch	9 (3)	Midas branch, no longer used. Set to the same default value of '123' for all customers on all accounts.
3	Account number	9 (10)	Foreign Currency Account number. Foreign currency accounts have the following structure: a six digit account number followed by a four digit suffix.
4	Record type	9 (2)	53 = reference record
5	Transaction type	X (16)	Optional narrative. Description of the transaction type.
6	Reference	X (16)	Optional narrative. Transaction reference details.
7	Payer name	X (16)	Optional narrative. The name of initiating party.

Closing balance record foreign currency account

Field	Field name	Field format	Comments
1	Record type	N (1)	6 = Closing balance
2	Subscriber ID	N (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
3	Account number	A (11)	Quoted string. NAB domestic accounts are in 2-3-4 format, hyphens included. The six digit BSB number is not included.
4	Closing balance	N (Min 4)	The balance is presented with two decimal places and no thousand ('000) separators. Debit amounts are preceded by a minus sign. The amount is not left-filled with zeros. The field has a minimum length of four. Examples: -1304.00 0.01
5	Spare	A	Empty quoted string.
6	Spare	A	Empty quoted string.
7	Record description	A (17)	Quoted string. Fixed content, always "CLOSING BALANCE"
8	Spare	A	Empty quoted string.
9	Spare	A	Empty quoted string.
10	Account owner name	A (Max 15)	Quoted string. The account owner's name.
11	Transaction date	A (8)	Quoted string in DD/MM/YY format. The date for which this closing balance amount applies.

NAB transactions

Transaction record

Field	Field name	Field format	Comments
1	Record type	N (1)	3 = Transaction record
2	Subscriber ID	N (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
3	Account number	N (11)	Quoted string. NAB domestic accounts are in 2-3-4 format, hyphens included. The six digit BSB number is not included.
4	Amount	N (Min 4)	The amount is presented with two decimal places and no thousand ('000) separators. Debit amounts are preceded by a minus sign. The amount is not left-filled with zeros. The field has a minimum length of four. Examples: -1304.00 0.01
5	Serial number	N (12)	Cheque serial numbers are located here if applicable. Otherwise this field is zero-filled.
6	Transaction code	N (3)	100 – 999 range. A full list describing each transaction code can found later in this document.
7	Particulars	A (Max 77)	Quoted string, empty if no data. If the originator of the transaction included information in the Particulars field, then it will appear here.
8	Reference	A (Max 65)	Quoted string, empty if no data If the originator of the transaction included information in the Reference field, then it will appear here.
9	Transaction date	N (8)	Quoted string in "DD/MM/YY" format. The date the transaction processed in or out of your account.

NAB opening balance record

Field	Field name	Field format	Comments
1	Record type	N (1)	5 = Opening balance
2	Subscriber ID	N (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
3	Account number	A (11)	Quoted string. NAB domestic accounts are in 2-3-4 format, hyphens included. The six digit BSB number is not included.
4	Opening balance	N (Min 4)	The balance is presented with two decimal places and no thousand ('000) separators. Debit amounts are preceded by a minus sign. The amount is not left-filled with zeros. The field has a minimum length of four. Examples: -1304.00 0.01
5	Spare	A	Empty quoted string.
6	Spare	A	Empty quoted string.
7	Record description	A (17)	Quoted string. Fixed content, always "OPENING BALANCE"
8	Spare	A	Empty quoted string.
9	Spare	A	Empty quoted string.
10	Account owner name	A (Max 15)	Quoted string. The account owner's name.
11	Transaction date	A (8)	Quoted string in "DD/MM/YY" format. The date for which this opening balance amount applies.

NAB closing balance record

Field	Field name	Field format	Comments
1	Record type	N (1)	6 = Closing balance
2	Subscriber ID	N (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
3	Account number	A (11)	Quoted string. NAB domestic accounts are in 2-3-4 format, hyphens included. The six digit BSB number is not included.
4	Closing balance	N (Min 4)	The balance is presented with two decimal places and no thousand ('000) separators. Debit amounts are preceded by a minus sign. The amount is not left-filled with zeros. The field has a minimum length of four. The field has a minimum length of four. Examples: -1304.00 0.01
5	Spare	A	Empty quoted string.
6	Spare	A	Empty quoted string.
7	Record description	A (17)	Quoted string. Fixed content, always "CLOSING BALANCE"
8	Spare	A	Empty quoted string.
9	Spare	A	Empty quoted string.
10	Account owner name	A (Max 15)	Quoted string. The account owners name.
11	Transaction date	A (8)	Quoted string in DD/MM/YY format. The date for which this closing balance amount applies.

NAB account suffix total record

Field	Field name	Field format	Comments
1	Record type	N (1)	8 = Suffix total
2	Subscriber ID	N (6)	Customer number, no longer used. Set to the same default value of '123456' for all customers on all accounts.
3	Account number	A (11)	Quoted string. NAB domestic accounts are in 2-3-4 format, hyphens included. The six digit BSB number is not included.
4	Sum of amounts for this suffix	N (Min 4)	The amount is presented with two decimal places and no thousand ('000) separators. Debit amounts are preceded by a minus sign. Zero is preceded with a space. The amount is not left-filled with zeros. The field has a minimum length of four. Note, for the debit record, zero will be presented as -0.00. Examples: -1304.00 0.01
5	Total number of transactions	N (Max 6)	A count of the type 3 (transaction) debit or credit records for this account, Zero if no type 3 records exist for this account. This field is not zero-padded.
6	Transaction code	N (3)	100 for debits 400 for credits
7	Record description	A (7)	Quoted string. Fixed content, always either "DEBITS " (note the trailing space) or "CREDITS"
8	Spare	A	Empty quoted string.
9	Spare	A	Empty quoted string.
10	Spare	A	Empty quoted string.
11	Transaction date	A (8)	Quoted string in DD/MM/YY format. The date for which these account suffix total records apply.

NAB all accounts total record

Field	Field name	Field format	Comments
1	Record type	N (1)	9 = All accounts total
2	Subscriber ID	N (6)	Customer number, no longer used. Set to the default value of '999999'.
3	Nominal account number	A (11)	Quoted string. Set to the default value of '99-999-9999'
4	Sum of amounts for all suffixes	N (Min 4)	The amount is presented with two decimal places and no thousand ('000) separators. Debit amounts are preceded by a minus sign. The amount is not left-filled with zeros. The field has a minimum length of four. Note, for the debit record, zero will be presented as -0.00. Examples: -1304.00 0.01
